Building Relationships, Retention, Referrals and Residuals.

SendOutCards®

the four types of people script

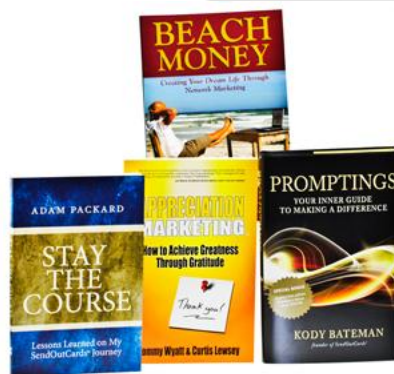

There are four types of people who become customers or distributors of SendOutCards:

- 1) People who want to send out cards, but who don't want to build a business.
- 2) People who like the idea of sharing the opportunity and want to supplement their household income.
- 3) People who are ready for a "Plan B" in their lives. They want to build a business, replace their full-time income and generate residual income for life!
- 4.) Those who do nothing at this time – they simply don't see the value for them and that's okay.
